

Accident and Incident Investigation Training

ACCIDENT AND INCIDENT INVESTIGATION TRAINING

Our accident and incident investigation training will provide your employees with a broad understanding of the accident investigation process and the information that needs to be gathered to establish the root cause and ultimately prevent accidents of a similar nature.

The training: -

- is suitable for line managers, supervisors, safety managers / advisors, safety representatives – and anyone with the responsibility for investigating accidents and incidents within an organisation
- will enable you to meet your moral and legal obligations to investigate accidents and incidents and establish the root cause of the accident to enable you to learn from the accident and take suitable and effective action to prevent similar occurrences
- can be tailored to your individual requirements and processes, eg: reinforce the use of your accident reporting procedures and the forms that must be used.

Investigating accidents and incidents
